Patient Guide Food Services - Providing Patient & Guest Meals

Food Services manages all cafeteria, catering and patient meal services, offering a range of healthful, nutritious foods for patients, families, visitors and medical center staff members.

Executive chef Adam Gilley trained at the Culinary Institute of America and has cooked in a number of prominent restaurants. He is constantly developing new menus and dishes to offer a wide selection of meal options in all of our venues.

In addition, all of our menu items are reviewed by registered dietitians, who adapt many recipes for special dietary needs such as low sodium or low fat content.
